Kitchen Bath Collection Faucets

Every KBC Vanity comes with a free faucet set, which includes the following PARTS per (1) SINK BOWL:

Box 1 FAUCET SET (photographs with SKU#'s in chart on pages 2 and 3):

Main Spout

Cold Handle (Turns clockwise to turn the water on)

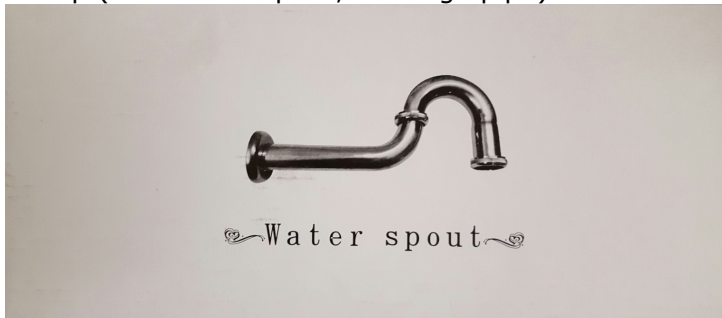

Hot Handle (Turns counter-clockwise to turn the water on)

Pop-up drain

(2) hoses

Box 2

P-trap (aka. water spout, drainage pipe)

General Observations:

- It is nearly impossible for all faucet parts to be defective. If the faucet is leaking, please identify which specific part is leaking, in order to replace that individual part.
- When identifying the **Hot or Cold handle (with attached valve)**, please follow the questions below:
 1. *"Does the handle turn clockwise or counter-clockwise to turn the water on?"*
 - The goal here is to determine the DIRECTION that the handle/valve turns in. This is important as the plumber or factory can potentially swap the identifying "C" or "H" caps without the customer knowing (the valves themselves look identical). IE. Essentially, the customer may think they need a Cold handle, when in fact they need a Hot handle.
 2. *"Is the finish shiny chrome or brushed nickel?"*
