

How to install sofa legs

What you need

- 2 Legs (included)
- 16 Screws (included)
- Screw Driver (not included)

What to do

1. Put sofa on a flat surface with bottom on the top, you will see small holes on 4 corners.
If there's no pre-drilled holes, feel the wood beneath the black fabric on 4 corners, you may screw the leg anywhere into the wood.
2. Place the leg along the edge of the sofa, using a screw driver to screw it in.
